🐨 Australian Citizen

A software engineer with an enthusiasm for coding and an analytical mind. I relish any opportunity to identify issues and formulate creative solutions. Social by nature, I thoroughly enjoy meeting people and working within a team environment. I have strong communication and leadership skills and continuously strive to learn and grow.

Areas of Expertise and Interest

HTML, CSS and Javascript
Ruby, Sinatra and Rails
Node.js and React
SQL and Postgres
Github and Heroku

Agile
Project Management
Communication
Teamwork and Collaboration
Stakeholder Management

Work Experience

Software Engineering Student - General Assembly - Jun - Sep 2020

I have recently completed an immersive 12 week course with General Assembly as a Software Engineer. Over this period of time I have learnt about topics and technologies such as HTML, CSS, JavaScript, DOM, Ruby, PostgreSQL, REST, Node.js, React and many more. During the course, I built 4 web applications listed below:

- **My Portfolio Website** - A simple portfolio website created to showcase my development as a Software Engineer. This was built using React to gain more understanding about this technology.
- **The Happy Path** - A group project showcasing our understanding of APIs, Git & Github project management, Ruby on Rails (Active Record), Sinatra, PostgreSQL and Ajax.
- **Gotei 13** - An anime themed CRUD application built to demonstrate a grasp of Ruby, Sinatra and SQL.
- **Tic-Tic-Toe** - A classic game focusing on DOM manipulation using front end languages such as HTML, CSS and JavaScript.

Building Manager - MICM Real Estate - Jul 2019 - Jun 2020

High-end residential complex - responsibilities included;
- Team leadership and implementing site-wide procedures
- Communicating information effectively with tenants, staff and managing entities (i.e. Managing Agents, Owners Corporation and Committee Members)
- Contractor negotiations, maintenance plans, and essential services schedules.

Building Manager - CCM Facilities - Nov 2018 - Jun 2019

High-end residential complex - responsibilities included;
- Training and management of all new staff members - formulating scopes of works and providing guidance in learning the roles
- Preventative maintenance planning
